

# FOKUS

## TECHNICAL SPECIFICATIONS

Albini & Fontanot S.p.A. Quality System  
CSQ ISO-9001

# Fokus, lots of solutions for small spaces.

**The structure** of the staircase consists of a series of thick plastic-coated, pressed steel elements.

They are made in such a way that when they are put together they form the tread support base. The system can be height adjusted, during installation, from 17 to 23.5 cm and the fixed going is 23 cm.

**The treads** are in natural, polished solid beech wood and are 34 mm thick with a satin finish. They are 54 cm wide.

**The railing** consists of plastic-coated steel spindles that are curved at the end with a diameter of 20 mm.

**The handrail** is in black knurled polyurethane with a flexible aluminium core that means it can be shaped into any form or curvature.

**The balustrade** is in the same elements as the railing.

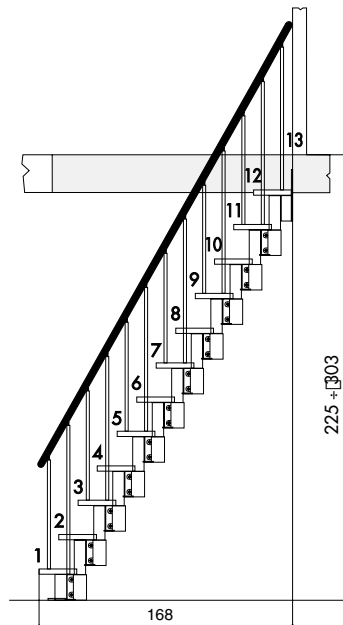

## technical-geometric specifications

To correctly calculate the dimensions (see the tables alongside the diagrams) it is necessary to take into account the following:

- the goings (**P**) are fixed at 23 cm.
- the riser is variable with continuity between 17 and 23.5 cm
- the treads (**G**) are available in widths from 54 cm.
- the last tread (**C**) is always positioned overhanging the finished flooring.
- the width of the staircase including the railing on two sides (**L**) is 69 cm

Table for calculating the number of risers.

NUMBER RISERS	STAIR HEIGHT cm
7	123 ÷ 162
8	140 ÷ 185
9	157 ÷ 209
10	174 ÷ 232
11	191 ÷ 256
12	208 ÷ 279
13	225 ÷ 303
14	242 ÷ 326
15	259 ÷ 350
16	276 ÷ 373

## some possible configurations with the **Fokus** system

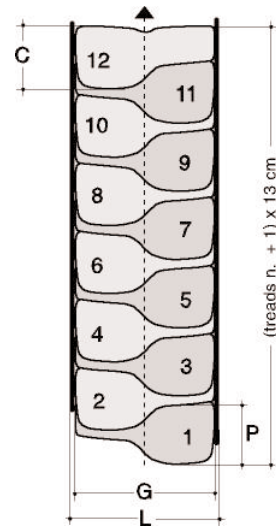

The measures are in cm.

**P = FIXED GOING 23**

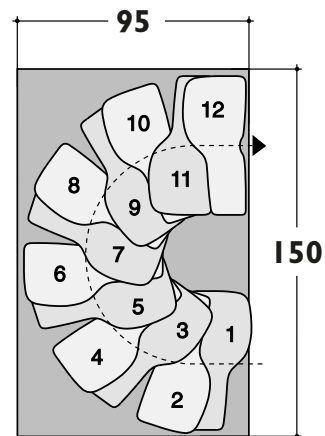

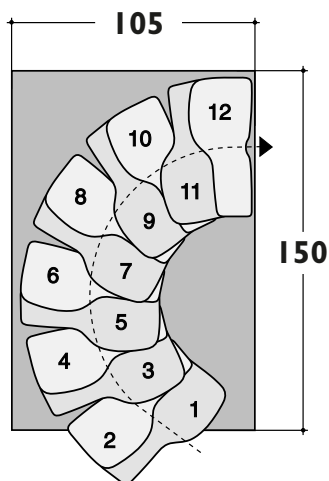

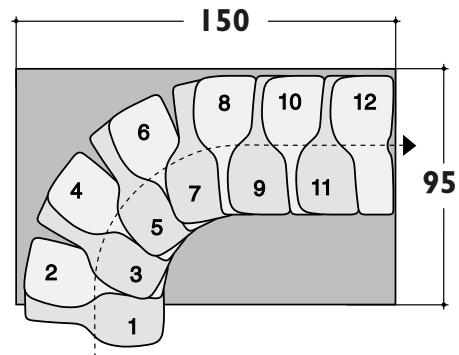

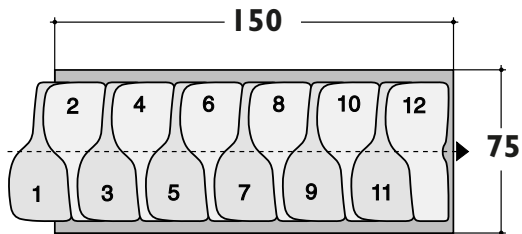

**L = 69**

**G = 54**

**C BELOW FLOOR LEVEL = 26**

Ceiling opening measures in centimetres

## service

Albini & Fontanot doesn't limit themselves to install staircases, but we also offer an articulate service, for a long lasting relationship.

**A direct vision of the products:** with a net of showrooms over the whole domestic territory, as well as you find models on place, you can find any kind of information.

**A multimedia vision of products:** thanks to the presence of a multimedia Totem close to every showroom, you can see the whole range of Albini& Fontanot products. The "navigation" in the inside of the Totem let you see every different aspect of the products. Besides, inserting all relative dates of the staircase that you like, you will receive an offer immediately.

**Free offers:** when you have seen the product, you will receive a first offer and a catalogue so you can value an eventual purchase of the staircase.

**Free designing:** our technicians will come to you so they can take the measures needed and we will give you the development of the project and the final offer free.

**Reliability on delivery timing:** the rapidity and the punctuality are our characteristics.

**Installation:** a net of high qualified layers guarantees the perfect installation of our staircases in the whole domestic territory.

**After-sales service:** the Albini& Fontanot commercial office is ready to answer any kind of request and to resolve every kind of demand.

**Green number 800.847021:** on the Albini& Fontanot green number you can ask for a catalogue and you can also ask for the nearest selling point in your town.

**Cleaning and maintenance:** all our products have their own product schedule where you can see all the technical-structural characteristics of the product, you will also find useful information of how to clean and maintain the staircase.
