## SCENIK T ROUND

These drawings represent a guide for a fast and correct design of a staircase in scale to be realized with the spiral SCENIK system with a round base:

- TREND T ● round
- SPORT T ● round
- CHIC LINE T ● round
- VERVE T ● round
- ONE T ● round

> The staircase, always custom made, has variable riser from 21 to 23,5 cm and from 18,5 to 20,5 cm for a large diameter.

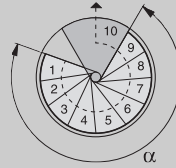

> The exit landing is used for the fastening of the superior part of the staircase. We provide three models: circular; triangular and trapezoidal, or according to your needs.

> The fastening of the staircase and the balustrade can be made through expansion plug. Because of this the installation has the advantage to be made in finished habitations.
